## HOMEWORK FOR THE WEEK

### Module 1

Mon: Study Lesson 6 Tue: No Homework Wed: No School

Thur: No School Fri: No School

### This Week

Monday we will work on Lesson 6 of Module 3. Lesson 6 opens the discussion about rational numbers on a number line. A rational number includes both positive and negative fractions and decimals. Unlike irrational numbers, these decimal values end at some point.

Tuesday, students will be completing a fluency assessment and practicing their problem solving ability.

## Social Studies / Science

### BIG IDEAS: Canada

Last week, students were introduced to our **Canada Travel Brochure** project. Students will be given three full days in class to work on their projects. This should be more than enough time in class to complete this project if students use their time wisely. However, if students do not finish by the end of class on Tuesday, they will need to finish over the holiday weekend. We will be sharing our projects on Monday 11/30.

All project requirements can be found on my blog including a finished example.

On Tuesday 12/1 we will start Science.
